

Notes on PullData

In this file, I have made a function pulling updated NBA statistics using Kaggle.

The data is from the following Kaggle page:

<https://www.kaggle.com/datasets/eoinamoore/historical-nba-data-and-player-box-scores>

The function may be called in other programs and allows for updated analysis to be made.

Disclaimer: In the GitHub version of this program, the PlayerStatistics.csv file is missing due to its size. To make some analysis, the user therefore needs to perform a successful pulling of data using this function. Doing this requires Kaggle to be installed, with an API key.
